

**Engaging the Private Sector...Scaling to Reach Millions**

With its integration into the CGIAR Scaling for Impact programme, the TAAT Clearinghouse will make proven technologies usable at scale, validating and packaging them with complementary innovations, and linking them to large public investments and agricultural delivery systems. TAAT is now positioned to connect innovations to a US\$1.5 billion AfDB-backed portfolio in 2026, expected to benefit 3.4 million additional smallholder farmers.

## Technologies for African Agricultural Transformation (TAAT)

- TAAT facilitates the private sector's adoption and commercialisation of proven and profit-oriented innovations to reach millions of farmers. TAAT links the private sector with large agricultural development investment programs and investments in Countries.
- TAAT has engaged over 20 private seed and agro-processing companies. By linking research institutions with commercial partners, TAAT has scaled over 40 climate-smart seed technologies and reached millions of smallholder farmers across the continent.
- **Technology Adoption:** Over 15 private seed companies have adopted 29 climate-smart crop varieties (including cassava, wheat, and rice).
- **Consortium Creation:** TAAT established the African Cereal and Legume Breeding Consortium (ACLBC) in collaboration with the African Seed Trade Association (AFSTA), providing a platform to attract over 200 seed companies to scale elite hybrid seeds.
- **Agribusiness Digitisation:** TAAT partnered with tech providers like eProd to digitise and streamline rice and cereal seed systems across several African countries.
- **Investment Facilitation:** Through high-level Investor Forums and Seed Sector Investment Roundtables (e.g., in Liberia, Zimbabwe, Sierra Leone, Cote d'Ivoire, Cameroon, Guinea, Kenya and Benin)
- **Supply Chain Strengthening:** TAAT actively engages regional processors and aggregators (e.g., ETG, SeedCo, PICS Global, and Premier Seeds) to bridge the gap between farmers and value addition in soybean, wheat, and aquaculture sectors.
